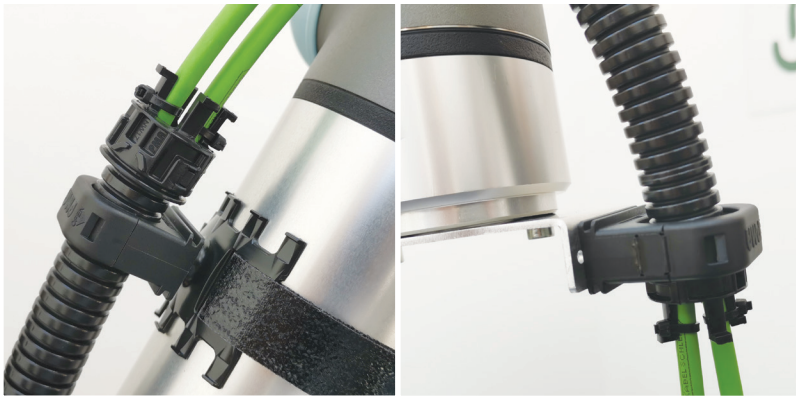
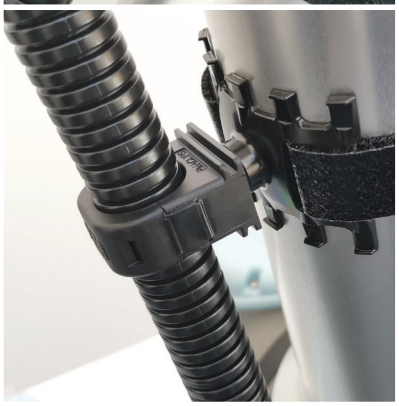
NEW – BN COBOT FLEX-KIT

- one kit fits all cobots

BN COBOT FLEX-KIT is based on our experience from developing robot kits for Universal Robot. The new robot kit is not developed for one specific cobot supplier, but fits the most of smaller cobots on the market. **Which make it a one fits all solution!**





- **Easily mounted on all robot types**
- **Hose termination with strain relief**
- **360° swivel and 10° tilt function**
- **Assembled in less than 5 minutes**
- **Maintenance free**
- **Extra high protection of hoses and cables**
- **Ultralight - weigth only 350 grams**

bagger-nielsen
we combine product, technique & knowhow

The BN COBOT FLEX-KIT contains:

3 meter of XTPCG flex hose

2 hose holders with swivel/**10°** tilt function

1 hose termination with strain relief

2 velcro straps

NB! It is possible to order extra components for the kit on request.

Technical data:

- BN COBOT FLEX-KIT is made of PA6 (the hose holders) and specially modified thermoplastic copolyester elastomer (the hose)
- Temperature range from –40°C to +105°C
- Designed for mounting on several different cobots using velcro straps
- Uniquely designed hose holder enables the hose to follow the robot's movements
- Strain relief ensures that the cables are kept in place
- Maintenance free
