INDUSTRY

ROBOTIC HAND FOR INDUSTRIAL APPLICATIONS

Soft-robotics
technologies for

INDUSTRY

RESEARCH

EDUCATION

The **qb SoftHand Industry** is an advanced anthropomorphic robotic hand, designed by **qbrobotics** for **industrial applications**. Thanks to its elastic joints and unique motion transmission system it autonomously adapts to the grasped object. Five mechanically connected fingers allow this end-effector to have both a **large gripping surface** and an adaptability level not found in other grippers. These peculiar features make the **qb SoftHand Industry** suitable for testing in all industrial applications where **human manipulation** is needed.

INTERCHANGEABLE GLOVES
FOR SPECIAL APPLICATIONS

WATER AND DUST
RESISTANCE IP65

SIZE AND ANATOMY LIKE HUMAN HANDS FOR **ERGONOMICS** AND **DURABILITY TESTS**

The **qb SoftHand Industry** is compliant with the **standards** and **certifications** of industrial and collaborative robotics
ISO/TS 15066:2016

Suitable for **food** and **horticulture**

MAIN APPLICATIONS

TESTING &
QUALITY INSPECTION

i.e. luxury, household appliance
industry, etc...

MANIPULATION IN
AGRIFOOD SECTOR

PICK & PLACE

RECYCLING OF
ELECTRONIC WASTE

MACHINE TENDING
