RoboShape is first robotic sanding solution that offer a complete plug-and-produce device that features a user-friendly design that makes it easy to use.

Easy installation
Perfect coupling system designed for quick connection to the client's existing system.

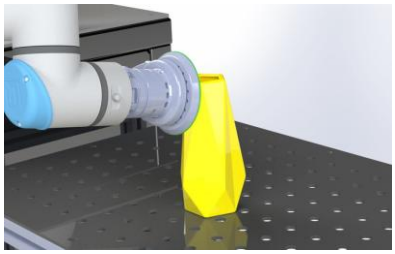
Fast setup
Easy waypoint setting and quickly program each part.

Flexible changes
Re-program fast for a wide range of part geometries and materials.
The system is flexible because it can work also with multiple disc granulations.

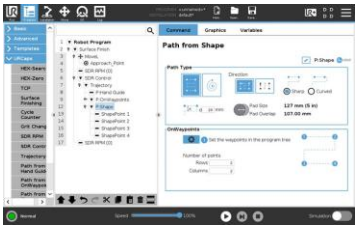
Assurance of quality
Complete system integrator verification.
Enhanced accuracy and safety both during system configuration and during operation.

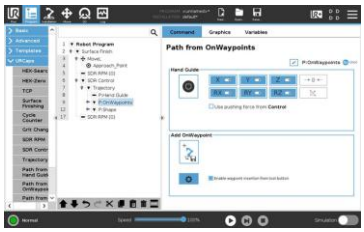
Maintenance/Service
To prevent failures, adjust the measured values to determine the maintenance intervals.

AutoChanger remover
Ensure easy and safe automatic abrasive discs replacement without requiring operator input.



3 ways to easily program your robot





Shape your future: Collaborate with RoboShape for perfect sanding every time

Specifications	
Voltage	230 VAC
Frequency	50 Hz
Dimensions	800 x 750 x 1800 mm
Weight	200kg
Buttons	• 1 pcs. Emergency Stop button • 1 pcs. Illuminated push button (Reset) • 1 pcs. Selector Switch (2 pos.) • 1 pcs. White Led indicator
Audible LED indicator	Yes
