What is SILVEYER Flex?

A cable cover designed to handle the complex movements of collaborative robots.

Limits twisting to $\pm 15^\circ$ per link, preventing excessive localized strain.

Ideal for routing robot wiring, allowing for smooth tracking of complex bends and rotations.

The cover can be opened and closed without tools, reducing maintenance time and effort.

URロボットのケーブル保護に「サイルベアフレックス」

UR Robot × SILVEYER Flex

Compatible with collaborative robots thanks to the hook-and-loop fastener design, which enables secure arm mounting.

Bracket Holder for Collaborative Robots

(Prototype currently available – contact us via the inquiry form)

Uses hook-and-loop fasteners for easy attachment to robotic arms.

Bracket Holder

【 Materials Used 】
Bracket Holder: Nylon
Hook-and-Loop Fastener: Nylon
